on, after discussion, Mr. Barrow proposed, and Mr. Ayers seconded, the following amended resolutions, which were carried unanimously:—“That, as it is very important that a first-class lighthouse should be established at Bridgewater, on the north coast of New South Wales, in the colony of South Australia, this Conference do hereby resolve to refer the question to the immediate attention of the Government, and to be appointed a committee to enquire into the expediency of recommending their willingness to pay half the cost of the lighthouse, and to contribute to its maintenance in proportion to the area of territory comprising the light district, and to report thereon during the light of the next session.” The speaker proposed the following resolution, but did not move it, in consequence of the chairman (Mr. Barrow) considering that it was not fair to New South Wales, and that immediately before the report of the Committee on the subject of the lighthouse had been carried, the resolutions were telegraphed to the Secretary of State for the Colonies, with a statement showing what colonies have contributed to each lighthouse.

and to contribute to its maintenance in proportion to usage of Victorian shipping using the light." The Government proposed the following resolution, but did not get the same consequences as in the Chairman's (Mr. Cresswell) considering that it was not far from New South Wales. That immediately before the report of the Commission signed, the following resolutions have been carried on the subject of the light, and the Chairman (Mr. Cresswell) telegraphed to the other Colonies, and the Colonies, with a statement showing what colonies have or not against each resolution, and a request that the Colonies should be asked to send a representative to the several Australian colonies. The Chairman stated that the Honorable Mr. Parkes desired the Colonies to be asked to send a representative of New South Wales to be in a protest against the change of the light.

The committee appointed to draw up the report of the Commission to the Conference submitted the same, which has been then read and perused, and the Committee in certain particulars, was finally approved, and by the members of the Conference.

Finlay proposed, and Mr. Vogel seconded, the following resolution:—“That the thanks of the Conference be tendered to the chairman, Mr. Parkes, for the great service rendered in the arduous and important position he occupied as Chairman of the Conference,” which was unanimously carried.

Reynolds proposed, and Mr. Barles seconded, the following resolution:—“That the Chairman be requested to inform the thanks of the Conference to A. C. Budge, Esq., of the Executive Council, for the efficient services rendered by him as secretary.”

The Conference then adjourned  *sine die* .

HENRY PARKES, Chairman.

---

**NEW SOUTH WALES  
PARLIAMENT.**

**LEGISLATIVE ASSEMBLY.**

TUESDAY, FEBRUARY 18.

**PEPPER** took the chair at twenty-seven minutes past the hour.

**INJURY CASES AT ORANGE QUARTER SESSIONS.**

In reply to a question from **MR. BUCHANAN** as to the number of cases of perjury tried at the Orange Court of Sessions.

**BUTLER** said that the return embraced a period of six months, and he was not in a position to answer it. He suggested that the hon. member should make a motion for an adjournment for such a purpose.

**COOK'S RIVER DAM.**

**HILL** asked the Secretary for Public Works, — 1. Is it necessary that the road along the Cook's River Dam is in an impassable state? 2. Has it not been usual Government to contribute annually as amount for this road in repair? 3. Will the Minister for Public Works say that any grant for the maintenance of the dam was abolished? 4. Having in view that the £200 the amount withheld by the Government for the two years for the maintenance of this road, which was placed in the hands of the Government, is not

W-He cause this amount to be used, so that it may at once be proceeded with?"

SUTHERLAND replied: "I am not aware that the Government has any disposable state, nor in my hands. 2. Yes, until 1871. 3. On the other the road was included in the Municipality of 4. No. It is unusual for the Government to provide for works within municipalities."

**MINING BILL.**

BUCHANAN asked the Colonial Secretary,—"Will positively when it is the intention of the Government to pass the Mining Bill?"

PARKER replied that if Monday was granted as a Government business, the Government would proceed with the Mining Bill on Monday.

**CIVIL SERVICE EXAMINATIONS.**

GREVILLE asked the Colonial Secretary,—"When return relative to the Civil Service examinations, which the House on the 10th December, 1872, be laid before the table?"

PARKER replied that the return in part had been

on the table on Friday last, and that the remaining would be laid on the table as soon as it was done.

**PAPERS.**

PARKER laid upon the table a copy of the minutes readings of the Intercolonial Conference.

As ordered that the document be printed.

**PETITION.**

FITZPATRICK presented a petition from 97 members of the Pastoral and Agricultural Association of Yarmouth, in support of the granting of aid from the public revenue to rural and pastoral associations.

The petition was received.

**PRINTING OF PETITIONS.**

STEPHEN BROWN moved:—That the petition laid by him on the 14th February, from Mr. Andrew relative to the Bowdoin Coal Mining and Copper Works, be referred to the Railway Committee.

MR. BEAVER moved:—That the petition presented on the 14th February, from William John Dangar, be referred to the Agricultural societies, be printed.

THE ALKALYD *EUCALYPTUS GLOBULUS*.<sup>1</sup>  
 PHRELP's moved—1. That in the opinion of this  
 fact that chemists in Europe have obtained  
 in "Eucalyptus Globulus" (the blue-gum tree in-  
 to Tasmania and Southern Victoria) an alkalo-  
 id of the same properties as the quinine of great  
 value in medicine, as well as commerce, render  
 able to ascertain to what extent the same alkalo-  
 id in the many species of Eucalyptus indigenous  
 to Australia, with a view to its application in  
 medicine. 2. That the Government should be-  
 come a new and great source of wealth to the  
 colony. 3. That to carry out the above purpose it is desir-  
 able that the Government should take immediate steps to  
 take the necessary measures for the purpose of the  
 resolutions be embodied in an address to His Exce-  
 lent the Governor.<sup>2</sup> He said he thought he should be  
 give the House information that would induce them  
 to take the matter of general importance. It was  
 might it might not appear so. From a long residence  
 abroad, he had been struck with the fact that there

The exception from fever and ague on the part of the living or dead bark is supported by the fact that Murrumbidgee, notwithstanding that there were dried-up swamps in the summer time which is an unpleasant effluvia and miasma. The cause of disease was not expected to be the tannin of the tree; but be believed that this true was now found out to be the alkaloid they contained. An bark had been long administered until the cause of the miasma was not known. The bark of H. would just give a few passages from the 9th March last, one of the highest altitudes.

*Myrica carpinifolia*, discovered in 1792, belongs to the Australian genus. The tree has grown as high as 150 yards, measuring in circumference. The antipyretic properties of the leaves have been known for a long time. It was first collected by Europeans about forty years ago, by the crew of the *Favorite*, who, decimated by ague, copied the natives and used it as a cure for fever. It was first described in the virtue of the plant before the Academy of Medicine at Paris in 1836 by G. C. Oudart, and was named *Myrica*. The properties seem to reside in an essence, or, rather, a

liquid carbon, which is the name of eucalyptol) is  
 N. Carhart, a physician of Alameda, remarks that the natives  
 of the district of Agaña, in the island of Guam, in the Marianas  
 (Gücker has had no opportunity to experiment with it  
 himself) use it to destroy the larvae of the *Phyllocnistis* which  
 they find on the leaves in powder, the dose varying from 60 to 140  
 grains. A decoction has also been given in cataplasms containing 8  
 grains of it to discontinue the eruption of the small pox. It  
 is very desirable to try the plant on a large scale." It  
 would now tell them why in his opinion it was destruc-  
 tive should be taken to see what were the pro-  
 perties of the plant, and to see if it were the same  
 and they possessed the properties this *glophium*  
 was shown to possess. This same substance  
 is to say —

— the substance of Retley, has also furnished us, with his ex-  
 periments of this drug in the October number of the *Prædictor*,  
 made from the leaves of this plant have been employed in  
 the treatment of eruptions of the small pox, and the  
 Macian says, as the result of his experience at Retley,  
 knows of no remedy, with the exception perhaps of the  
 use of the leaves of manihot, which he has used in the  
 treatment of eruptions of the small pox, and in the  
 irritation, and procuring sleep, in cases of chert anæmia

[illegible]

the drug was employed conjointly with quinine. Another page of the same journal, it was stated that Rabuteau, of Paris, has been carrying on a series of analyses with the object of making out whether the of eucalyptus globulus contains a febrile alkaloid. He is first subjected to evaporation an alcoholic solution of eucalyptus, and adds to the residue, which he obtains on an addition and precipitation of a yellowish resin. The separation resin was still more completely effected by means of ether. The liquid remaining was afterwards filtered and evaporated of the tannic acid, and the residue of a salt of iron. The residue was then searched for by means of iodide of zinc and phospho-molybdic acid, and the results were entirely negative." But, in forty-two experiments, the results were almost negative, it was found. He believed there

The rain has done much good to the maize and potato crops. Saturday's Orange paper reports that fruit trees of every description (excepting grapes) have this year borne in proportion to the amount of rain. The quantity of fruit is good and break down with it, while the soil is so that can be found for it to feed the fruit. The fruit is not only very abundant but of fine quality. The quantity of fruit is good and break down with it, while the soil is so that can be found for it to feed the fruit.

The main sewer in the city, with the exception of a portion of it in Pitt-street, has been in good working order during the year. The sewer in Pitt-street, which was found to be in bad order, has been repaired, and is now in good working order. of infantry only seven men have learnt trades since they entered the army. There is, however, nothing in this which will astonish practical soldiers.

We have pointed out some of the obstacles to regular work in the army, and we may add another—namely, the constant change of quarters, that foolish and objectionable relic of old times. If skilled workmen find little opportunity or inducement to acquire a trade, the difficulties in the way of acquiring one are still greater. In the first place, there is the absence of tools, materials, and accommodation; and, in the second place, the skilled workman would derive no advantage from initiating a raw hand into the mystery of his craft. A careful examination of the return proves, in short, that there is no extensive and regular system for the utilization of military labour, and we shall presently bring forward considerations which make it very questionable whether such a system is desirable. Nevertheless we learn that by the desultory, almost spasmodic, substitution of military for civil labour, the Government has saved no less a sum than £15,804 16s. 4d. From this sum, however, ought to be deducted the cost of accommodation and tools. In the course of the year 416 men were employed on public works of various sorts, and received as working pay £2262 7s. 2d., or, on an average, nearly £5 8s. 9d. per head per annum. In the same time 100 men were employed in industrial occupations, and earned £294 5s. 6d., or an average of about £2 18s. 9d. per head per annum. From this sum also must be deducted the cost of tools. The benefit to the soldier cannot therefore be reckoned as very great. Much stress is laid upon the expediency of appointing only artificers as pioneers; but in many cases commanding officers were unable to find sufficient numbers of men to do this description. In almost every instance the pioneers have, when possible, been employed on public works—a course which seems to us far from wise. The pioneers ought to be really what their title implies, regimental sappers, and to be employed in learning and imparting to their comrades a knowledge of field engineering. A carpenter, bricklayer, or mason is undoubtedly better qualified than an ordinary labourer for field engineering; but his skill should be utilised in the duties connected with that art, and not in merely building barracks, repairing furniture, and the like. The same argument applies not only to pioneers, but to all soldiers. The first object of the military authorities should be to fit soldiers for fighting, and this is now a task requiring the whole of men's time. If men are taken away from their military duties, and set to work at trades which have no connexion with their profession, their efficiency must inevitably suffer. It is not enough to teach a soldier the art of war; he must be continually practised in it, or he is sure to deteriorate, for it is an art that requires not only knowledge, but use and habit. True military efficiency must have the character of an instinct or second nature. Else we might disband the army, and trust the defence of the country entirely to Volunteers. But we confess that we are rather at a loss to know what is Mr. Tracy's precise object. Does he wish to make it incumbent on all soldiers to engage in industrial occupations? or would he merely grant facilities and encouragement? If the former, men who are already in the service would certainly feel that they were suffering from a breach of faith, while, as to the classes which have hitherto furnished recruits, they would in future give but a scanty supply. If the latter, the majority of soldiers would complain bitterly of having to do guard and fatigue duty for comrades struck off duty in order to do tradesmen's work. As it is, soldiers were not so struck off, but continuous work could be carried on. We have one more objection to urge against the scheme, and that is, that if all the time that can be spared from military duties is to be spent in working at trades, there will be none left for the soldier's education. In short, consider the matter as we will, we can find no valid plea for the introduction of this so-called reform. A man who is a good tradesman can, under present arrangements, generally obtain plenty of occupation, as is shown by the return before us, and as is known by all experienced regimental officers. To convert the army en masse into a body of untrained mechanics would be to sacrifice a primary to a secondary object. The primary object is to fit our army to meet an enemy in the field, and mending chairs or tables will scarcely conduce to the attainment of that object. Which is more important, to save the taxpayer ten or twenty thousand pounds per annum, or to secure the maximum fighting efficiency of our army? There can be but one answer to such a question, and it has been practically given by the Duke of Cambridge and Mr. Cardwell.

PHYSICAL PREJUDICES.  
Do tall men and men of large physique dislike and distrust little men? We have, we think, once or twice met with the traces among tall men of a feeling of that kind, quite real, though unacknowledged even by themselves, and it crops out now and again in print. Some one wrote to the Times a year or two ago a letter in which he avowed that he could not in spite of his great size like little men; and saw it recently stated in a novel that little men are usually cunning and always timid, and a writer in the Liberal Review penned a week or two since an entire thesis in which the existence of a hostile feeling, a kind of resentment in tall men at the self-assertion of little men, was assumed all through, and deprecated, though not justified. This writer thought the origin of the feeling was a failing which of course would be more noticeable in them than in equally conceited but heavier human beings; but the dislike, if it exists, would appear more usually to take the form of a faint dread, as if little men must have a sinister mental capacity to make up for their lack of physical weight. Some such feeling must, consciously or unconsciously, have influenced the people who originally invented the old Northern legends of dwarfs and giants, in which the dwarfs are always so malicious and so clever, the giants usually so good-natured and so stupid, and have produced the very curious general impression that the great men of earth have been men of less than average stature. There is no foundation whatever in history for the idea that size of body affects the brain, for if we take Alexander, Caesar, Napoleon, Wellington, and Thiers, to be little men, Moses, Chamagagne, Mohammed, Luther, Goethe, Frederick the Great, Bismarck, and dozens of others have been beyond the average either in height or bulk, and some of the greatest names have been those of men of average size. The prejudice against size may, however, have had a historic origin, civilisation having first sprung up among the lighter-limbed races, who would appear to their conquerors very feeble beings very much to be dreaded for their wisdom. That is the uni-

versal feeling at this moment in Northern India, among the warrior races about the Benares, the highest and ablest race in Asia. The contrary idea, the dislike of little men by big ones, if it really exists, must be one of the hundred physical prejudices which were once accepted as truths, and many of which still linger in the popular mind, defying reason and argument and even experience. Perhaps the strongest of them all

## BUSINESSES FOR SALE.

## EXTENSIVE COUNTRY BUSINESS.

A Lease will be given for a term of three or five years of a **MANCHESTER HOUSE**, Cheap, Orange, together with good will of the business. The present proprietor was established near Orange in 1845, and opened the present establishment in Orange in 1850. ## AUCTION SALES.

## CITY INVESTMENT.

**DRUIT-STREET.**  
COTTAGE, No. 82, on the north side, next to the Police Office, at the corner of YORK-STREET, and opposite to the NEW TOWN HALL.

Title unquestionable. Particulars may be obtained on application to Messrs. HOLDSWORTH and BROWN, Solicitors, Pitt-street.

**RICHARDSON and WRENCH** have received instructions to sell by public auction, at the Rooms, Pitt-street, at 11 o'clock, ALL THAT PARCEL OF LAND, being part of allotment No. 7 of section 24 of the City, having 43 FEET 4 INCHES frontage to DRUIT-STREET, with a depth of 66 FEET, and a width at the back of 66 FEET, and is erected No. 82, A BRICK-BUILT VERANDAH COTTAGE, containing 6 rooms and kitchen, with blacksmith's shed and other out-buildings, large yard (with side gate entrance), water laid on, &c., at the rear.

The valuable and improving position of this property, being immediately opposite the NEW TOWN HALL, renders it a very desirable city investment.

Plan at the Rooms. Terms at sale.

## BY ORDER OF THE MORTGAGEE.

**WEATHERBOARD COTTAGE, GARDEN AND VERANDAH**, adjoining the Village of BALGOWLAH, known as Mr. J. HARLAND'S property, about fifteen minutes' walk from the PIER at MANLY BEACH.

The land, comprising 5 acres and 17 perches, is nearly all cleared and planted with upwards of 300 choice fruit trees, mostly in bearing.

The Cottage contains four rooms and kitchen, with shed, abundance of water, &c.

**RICHARDSON and WRENCH** have received instructions from the mortgagee to sell by public auction, at the Rooms, Pitt-street, on FRIDAY, 22nd FEBRUARY, at 11 o'clock, The above described property.

Terms at sale.

**BURNETT DISTRICT, QUEENSLAND.**  
For Positive Sale, RAWBELLE, situated about fifty miles from GAYNDHAH, together with numerous improvements, and a WELL-BRED HERD OF CATTLE.

7400 HEAD, more or less.

**RICHARDSON and WRENCH** have received instructions to sell by public auction, at the Rooms, Pitt-street, on FRIDAY, 22nd FEBRUARY, at 11 o'clock, The above valuable pastoral property.

RAWBELLE CATTLE STATION comprises four blocks of country, with RAWBELLE, DRY CREEK, and GLENHILL.

adjoining each other, and embracing a very large area of well-grassed grazing country, abundantly watered throughout.

THE IMPROVEMENTS are very extensive, and include comfortable homestead, and every modern appliance for working the property in an economical and business-like manner.

THE HERD OF CATTLE to be sold with the above property numbers:

7400 HEAD, more or less, all carefully well-bred, no expense having been spared in the purchase of bulls to keep the herd up to a high standard of excellence.

\* This herd was mustered and delivered over to the present proprietor on the 31st of August last, and then numbered:

4256 males  
4519 females  
1600 speckled cows

in all 9375 heads, from which a draft of 1900 bullocks has been sent away, leaving the herd as follows:

2330 males  
4519 females  
600 speckled cows

in all 7400 head more or less, at which number they will be sold without reserve or delivery—the value of the spring and summer increase—calves having been sent since the 1st of September—will be given in, and also right of brand.

Specification of the ages of the cattle may be inspected at any time, where satisfactory evidence of the number of the herd may also be obtained.

The particular attention of intending purchasers is directed to the above, under which RAWBELLE is well-known herd of highly-bred cattle will be sold; and it is believed that as a general number of the herd has been made recently, it is more to the advantage of purchasers to accept mustered than to have the cattle knocked about by a second muster with so short a time intervening.

Plan on view at the Rooms. Terms at sale.

**BURNETT DISTRICT, QUEENSLAND.**  
For Positive Sale, RAWBELLE, situated about 50 miles from Gayndah, with numerous improvements, and a WELL-BRED HERD OF CATTLE.

28,000 SHEEP, more or less.

Stones, Working Plant, and other belongings, to be taken by valuation in the usual way.

**RICHARDSON and WRENCH** have received instructions to sell by public auction, at the Rooms, Pitt-street, on TUESDAY, the 11th MARCH next, at 11 o'clock, The above valuable pastoral property.

THE RAWBELLE SHEEP STATION, comprising the five large blocks of country.

BOCKALOOPAL MOUNT FORTITUDE UPPER FIREN LITTLE BURN and GLENHILL.

All sound, healthy sheep, pastured, consisting of open hill, richly grassed, and silver ash timbered ridges, all FREE FROM ORANGE and other insect pests, and watered by the Rawbelles River and its many tributaries, and Bockaloop Creek. The Grenville flock is supplied by water by the creek of the same name throughout the entire length.

The improvements comprise a homestead of five rooms, with detached kitchen, dining yards, and many other conveniences for carrying on the property with four times the amount of the present stock.

With this station will be sold 25,000 SHEEP, more or less, nearly all young, and of good quality. A specification of their ages and sexes will be published in a few days.

An inspection of the above property is invited.

Terms at sale.

**GREAT CLEARING SALE OF STATIONS IN QUEENSLAND.**

THE DISTRICT OF MARANO.

LOT 1.—THE CANABO STATION, comprising 9 large blocks of country on the Towle Creek, about 140 miles beyond Dalby, together with extensive improvements, and 12,000 SHEEP, more or less, and the right of brand to the GB herd of cattle belonging to the same Station.

Wethers, 2,500—Two and three years old. Hogs, 2,500. Rams, 1,500.

There are also about 3700 lambs, which will be about five months at the time of purchaser taking delivery, and will be given in free of charge.

About 60 head of cattle, a quiet milking herd, will have to be taken by the purchaser at £3 per head, and stores and working plant by valuation in the usual way.

These runs are about 30 miles from Springvale, and adjacent to the property of J. D. Macdonald, Esq., and other first-class stations.

Attention is particularly called to the state of the above highly improved property, which is very attractive to a buyer, under which they are offered.

The Rawbelles are the best stocked, and the present improvements they are capable of carrying 40,000 head all the year round, while the season's increase, and working plant by valuation in the usual way.

These runs are about 30 miles from Springvale, and adjacent to the property of J. D. Macdonald, Esq., and other first-class stations.

**RICHARDSON and WRENCH** have received instructions to sell by public auction, at the Rooms, Pitt-street, on FRIDAY, 22nd FEBRUARY, at 11 o'clock, All that parcel of land situated on the east side of MacArthur-street, SOUTH, having 23 FEET 4 INCHES frontage, with a depth of 70 FEET, on which are erected TWO TWO-STORY HOUSES, Nos. 323 and 326, built of brick, on stone foundations, and containing each verandah and balcony, 4 rooms, kitchen, and bathroom, with good yards; water laid on, &c., at the rear.

RENTAL £1 & PER WEEK, or £72 PER ANNUM.

The above freehold is favourably situated in a populous part of the City. It is now in the market for bona fide sale, and with confidence be recommended as a permanent City investment.

Terms at sale.

**DISTRICT OF MARANO, QUEENSLAND.**  
FOR POSITIVE SALE.

The following first-class Sheep Station, viz., LOT 1.—WALLUMBILLA, with 14,800 SHEEP, more or less, and a small herd of cattle.

LOT 2.—KILMOREY, with 14,818 Sheep, more or less, and a small herd of cattle.

Stores, Working Plant and other belongings of the above properties to be taken by Valuation, in the usual way.

**RICHARDSON and WRENCH** have received instructions to sell by public auction, at the Rooms, Pitt-street, on TUESDAY, 4th MARCH NEXT, at 11 o'clock, The above-mentioned first-class pastoral properties, of which the following are some of the particulars, viz.:

LOT 1.—WALLUMBILLA.—This station is situated about 10 miles from the latter town, and consists of six contiguous blocks, forming an area of about 217 square miles of sound healthy sheep country, principally upland and low, well grassed and watered. It is also nearly all supplied with several varieties of self-sown, and with the exception of a very limited area of about 10 square miles, is well watered. The water supply from the Wallumbilla and Pickering Creek, and tributaries, is permanent and abundant, even in the driest season. The run is a well-stocked and improved station.

THE IMPROVEMENTS at head station comprise comfortable cottages of six rooms, with detached kitchen of four rooms, office, harness room, stable, &c., newly erected, with leather press, and drying room for batters for 800 sheep, &c. The wash-pool is situated about half a mile from the head station, and is supplied with water from a spring, and is capable of washing 1000 sheep per day. The paddocks are numerous, being about 2300 acres enclosed about the homestead, as well as three other large paddocks enclosing an area of 72 square miles.

With WALLUMBILLA will be sold the following sheep:

EWES ..... 1 and 2 years old ..... 1316  
3 years old ..... 1012  
4 years old ..... 845  
5 years old ..... 1223  
6 years and upwards ..... 339

Total ewes (more or less) ..... 6935

WETHERS, mixed sexes (more or less) ..... 6781

WEANERS, mixed sexes (more or less) ..... 1511

RAMS (more or less) ..... 80

Total sheep ..... 14,871

of very superior breed, the original stock being principally from the noted Glenelg flock, Darling Downs.

**LOT 2.—KILMOREY STATION**, which adjoins the WALLUMBILLA, is about 70 miles from the latter town, and comprises the Macarthur, Bryan Ryan, Alcorn, and Orallo No. 2 runs, giving an area of about 100 square miles of healthy, richly grassed country, principally upland, and is well watered. The paddocks are numerous, being about 2300 acres enclosed about the homestead, as well as three other large paddocks enclosing an area of 72 square miles.

With WALLUMBILLA will be sold the following sheep:

EWES ..... 1 and 2 years old ..... 1036  
3 years old ..... 6238  
5 years and upwards ..... 2530

Total ewes (more or less) ..... 9104

WETHERS (more or less) ..... 3487

WEANERS (more or less) ..... 2149

RAMS (more or less) ..... 87

Total sheep ..... 14,918

of similar quality to the Wallumbilla flock.

The WALLUMBILLA Station has a bi-weekly Coach Mail to the door, and Kilmorey a weekly mail to within 12 miles of head station, no expense has been spared to render these properties complete for economical working.

As the above stations are for sale, it is desirable to close accounts, the attention of capitalists is specially directed to them, and an inspection invited.
